

Blue Island for Project Management Profile

Talent, Teams & Complete Operations

Blue Island provides individual specialists, dedicated teams and managed business operations. We can support a function, strengthen an existing department, or coordinate an end-to-end operation under agreed governance, service levels and reporting.

- On-site, remote and hybrid delivery
- Staff augmentation and dedicated teams
- Project-based and managed-service models
- Operational governance, KPIs and reporting

Mission, Vision & Goals

One direction across every Blue Island service line.

MISSION

Empower businesses to achieve sustainable performance by delivering professional services with excellence, driving efficiency, and creating long-term value.

VISION

To be a trusted business partner of choice for Saudi Arabia's business community, enabling sustainable growth and contributing to the realization of Saudi Vision 2030.

OUR GOALS

Our goal is to deliver trusted, high-impact professional services that strengthen performance, improve efficiency, and create lasting value.

End-to-End IT Services

Strategy, people, operations and security—managed as one connected technology service.

MANAGED IT SERVICES

Service desk, infrastructure, networks, cloud, applications, monitoring, maintenance and SLA reporting.

IT OUTSOURCING

Dedicated L1/L2/L3 specialists and technical teams delivered on-site, remotely or through managed-service models.

IT CONSULTING

Technology strategy, architecture, solution design, IT governance, ITSM, vendor coordination, data and automation.

IT SECURITY

Risk reviews, vulnerability assessment, IAM, endpoint hardening, monitoring, incident support and compliance alignment.

Build, Run & Protect

- Requirements discovery and solution design
- Web, mobile and business application delivery
- API, ERP and CRM integration support
- Testing, release, DevOps and enhancement cycles
- Security assessment and control implementation
- Alignment support for NCA, PDPL, ISO 27001, NIST, CIS and OWASP

Reliable Finance Operations

- Bookkeeping, general ledger and chart of accounts
- Accounts payable, receivable and bank reconciliation
- Month-end closing and management reporting
- Budgets, forecasts, cash-flow and KPI dashboards
- Payroll accounting and fixed-asset records
- VAT, ZATCA and e-invoicing process support

Audit Readiness & Internal Control

INTERNAL AUDIT SUPPORT

Process reviews, risk registers, control testing, working papers and remediation tracking.

FINANCIAL REVIEW

Account reconciliations, schedules, evidence organization and external-auditor coordination.

POLICIES & SOPs

Process mapping, approval matrices, finance procedures and operational documentation.

RISK & COMPLIANCE

Control monitoring, issue follow-up and governance reporting for management oversight.

Regulated assurance, statutory audit and tax opinions are delivered through appropriately licensed professionals where required.

We Can Operate a Complete Business Function

OPERATING DESIGN

Roles, workflows, SOPs, authority matrix and service calendar.

PEOPLE & DELIVERY

Recruitment, onboarding, daily coordination and performance management.

TECHNOLOGY

Systems, access, service tools, data flows and operational dashboards.

FINANCE & CONTROL

Budget tracking, reconciliations, controls, approvals and reporting.

VENDORS & FACILITIES

Supplier coordination, work orders and administrative support.

MANAGEMENT REPORTING

KPIs, governance meetings, risks, actions and continuous improvement.

Professional Event Operations

Planning and delivery support without catering services in the current scope.

- Event concept, schedule and delivery plan
- Venue and supplier coordination
- Registration desks, ushers and guest flow
- Stage, audiovisual and technical coordination
- On-site operations and issue management
- Post-event close-out and reporting

Structured for Accountability

DISCOVER

Objectives, current state, volumes, skills and risks.

DESIGN

Operating model, team, controls, SLAs and transition plan.

TRANSITION

Knowledge transfer, onboarding, access and readiness checks.

OPERATE

Daily delivery, support, escalation and stakeholder coordination.

MEASURE

Dashboards, KPIs, service reviews and control evidence.

IMPROVE

Automation, optimization and continuous capability development.
